COMPLAINT DESCRIPTION (INCLUDING DATE AND TIME COMPLAINANT AT ESTABLISHMENT):

- ✓ 1. Establishment only has 1 restroom and has more than 16 chairs. *Addressed - 18 interior 17 outdoor total - 35*
- ✓ 2. Pervious surfaces at counters and floor/wall assemblies. *Addressed*
- ✓ 3. Ceiling over food prep with loose contaminated surface. *Addressed*
- ✓ 4. Light Bulbs over cooking surface not protected from breaking contamination. *Addressed*
- ✓ 5. Exterior holes in wall and floor assemblies not protecting against insect/vermin. *(Only trap exterior wall front glass Addressed caulking around plumbing etc)*
- ✓ 6. Plumbing appears to be leaking at grease trap.
- ✓ 7. Hand sink without signage. *- Gave signage - one sink had signage*
- ✓ 8. Mops are hung to dry off of plumbing lines contaminating walls. *Only clean mophead on plumbing*
- ✓ 9. Storage of toxic materials in hand washing area. *- Below sink adjacent to comp sink - No food/food contact around this area*
- ✓ 10. Open ice bin scoop in soiled laundry area. *- Not touching - No soiled laundry stored over or contacting*
- ✓ 11. Hot water for ware cleaning 109 degrees. *Temped 120° laundry can be placed in machine without contamination to scoop*
- ✓ 12. Outdoor refuse area stored in public right of way. *Addressed*

DISPOSITION:

This inspector addressed 12 items as listed in complaint - explained corrective procedures - It should be noted that No food prep was found on pervious surfaces - No contamination was seen falling from ceiling. Found no leak at New grease trap. Spoke to management about slow floor drain which may spill over (caught by pan put in place to stop spillage) Gave signage for Hand sink which did not have handwash signage (Manager to display at sink) Ice bin scoop not touching contaminant if soiled laundry area (however suggested being careful when doing laundry) Mops not hanging from plumbing (only clean mophead) suggested Plexiglass to create non porous surface. ~~When~~ mops touch wall. No refuse stored in public right of way.
